What is "the news page"? <http://commons.gc.cuny.edu/activity/> and <http://news.commonsc.gc.cuny.edu/> are both loading fine for me.

The "news page" is what you get when you click on "news" in the nav bar - <http://commons.gc.cuny.edu/news/>

Weird. Now, clicking on that link takes me to /activity, which works. Before, it took me to the page above. Any way to check whether a link to /news appears anywhere in our code?

I'm seeing a link to /news on the nav bar when I'm on the wiki.
