Description			
I'm trying to embed an audio file located at http://commons.gc.cuny.edu/wp-content/uploads/DSG-CUNY-Eben-Moglen.mp3			
Neither of the plugins that we have on the Commons for this purpose -- Apture or WordTube -- seem to work. The WP install strips away the apture code when I try to preview or publish, and even after I activate WordTube, I don't see any options for it in the post-writing box.			
Do you have any suggestions?

Perhaps we should install this plugin? <http://wordpress.org/extend/plugins/media-element-html5-video-and-audio-player/>

Added Media-element plugin to [github](#)

When you added the plugin in <https://github.com/castiron/cac/commit/25cf8e2552cedbfd98d3cf7a910a5318040269dc> you didn't include all the plugin files. Fixed in <https://github.com/castiron/cac/commit/d6ad9f9e153450ed524b1516183950905fe19a4d>

BTW the correct location for the file you uploaded is <http://commons.gc.cuny.edu/wp-content/uploads/media/DSG-CUNY-Eben-Moglen.mp3> (note the 'media').
