

CUNY Academic Commons - Bug #4125

Help overlay layer issue

2015-06-04 06:55 PM - Matt Gold

Status:	Resolved	Start date:	2015-06-04
Priority name:	Normal	Due date:	
Assignee:	Daniel Jones	% Done:	0%
Category name:	WordPress Themes	Estimated time:	0.00 hour
Target version:	1.8.2		
Description			
Please see the attached screenshot, which shows a problem where the help overlay appears below content on the page instead of over it.			

History

#1 - 2015-06-04 07:15 PM - Boone Gorges

- Category name set to WordPress Themes
- Assignee changed from Boone Gorges to Daniel Jones
- Target version set to 1.8.2

Dan, can you take a look please? I assume the theme is being unreasonable about z-index.

#2 - 2015-06-06 07:31 PM - Daniel Jones

Yep the Canvas theme that the help site is based on has its main navigation z-index set to 9000, and the overlay is only at 1001.

The child theme we're using says a style.css that just brings in the Canvas css file, and it says to use a provided custom.css file to add any other css. It doesn't look like that file is there though. Should I just add the css to child theme's style.css file, change the z-index of the overlay to something higher than 9000, or something else?

#3 - 2015-06-08 08:28 AM - Boone Gorges

Thanks, Dan. We shouldn't change Canvas, so I guess we'll have to up our own z-index to something like 10000. Can you take care of that please?

#4 - 2015-06-08 10:26 AM - Daniel Jones

Sure thing - <https://github.com/cuny-academic-commons/cac/commit/b1c30164e327e334b001a90a7c41e341f80ed6f6>

#5 - 2015-06-08 10:34 AM - Boone Gorges

- Status changed from Assigned to Resolved

Thanks, Dan!
