Description			
It looks like bbP Single Forum Search is broken somehow. When I activate it on the main site, I get the success message "Plugin activated", but it still shows as not activated, and the search box is not showing up. Ray, any ideas?

Boone, I cleared the object cache and that appears to have fixed the issue.

Not sure what might have caused the problem though. Might need to keep an eye on this.

FYI, I used this snippet to clear the cache:

```
apc_clear_cache();
apc_clear_cache( 'user' );
apc_clear_cache( 'opcode' );
```
