#### Description

Just noticed that the wiki is experiencing just the opposite symptoms as after release 1.1. Newer pages seem to display images correctly, but older pages are displaying hyperlinks instead of images. Example of a page just showing the hyperlinks is the main wiki page: [http://commons.gc.cuny.edu/wiki/index.php/Welcome\\_to\\_the\\_Academic\\_Commons\\_Wiki](http://commons.gc.cuny.edu/wiki/index.php/Welcome_to_the_Academic_Commons_Wiki)

Must be a config problem again. Thanks!

This one was a problem with some repo cleanup I had done with 1.1.1. I believe I have fixed it. Would you mind checking, Scott? Mark as resolved if fixed.

Is this supposed to be resolved on production or cdev? I'm still seeing a problem here - [http://commons.gc.cuny.edu/wiki/index.php/EPortfolios\\_Committee\\_WIKI](http://commons.gc.cuny.edu/wiki/index.php/EPortfolios_Committee_WIKI)

That's a different issue - the image is actually there, but for some reason it is all black. I'll dig a good copy out of the archive.

I did some spot checking on the wiki and that's the only page I saw with a problem now.

André, can I ask you to recursively chown and chgrp /var/www/wiki/images to commons:commons? Thanks!

##### #7 - 2010-12-21 02:42 PM - local admin

Done, no problem.

Thanks, André, worked like a charm!
