<b>Description</b>			
QUESTIONS FOR THE PERSON REQUESTING THE PLUGIN/THEME [generally this means Matt or a community facilitator]			
- What's the name of the plugin/theme?			
Tag Sticky Post <a href="https://wordpress.org/plugins/tag-sticky-post/">https://wordpress.org/plugins/tag-sticky-post/</a>			
- [plugins] In a few words, what does it do?			
Allows for a post to be sticky in a tags archive page.			
- How is the plugin/theme different from what's already provided on the Commons?			
Currently there is basic sticky post and category sticky post capability, however it is not possible to have a sticky post for a tag archive page.			
- What's the potential impact? Who will use it?			
The plugin allows for long term planning of content by allowing a blog to state what a category is or highlight a exemplar post that shows what the tag will feature. It prevents important content from being lost over time. In classroom spaces, it will also allow a course leader or blog admin to define how a tag is used on a tag page.			
- Who initially made the request? [sometimes Matt is passing along requests from members, sometimes suggesting something he found himself]			
Jade E. Davis at LaGuardia CC			
- Who is the plugin author?			
tommcfarlin (also authored the category sticky already in the commons)			
- Say a little bit about the release history and popularity of the plugin. How many times has it been downloaded? When was it last updated?			
The plugin was updated 7 months ago and has over 200 Active installs. It is compatible with the most recent release of wordpress.
