Description			
The settings page of "WP Post to PDF" plug in shows up as blank, and settings are not able to be changed. In particular, the Journal of American Drama and Theatre (jadt.common.gc.cuny.edu) is attempting to have the author of their posts show up when the pdf is created, which currently is not occurring when visitors to their site use the plugin to create pdfs of the articles they post on their site, presumably because of a setting that needs to be changed?

Thanks for the report, Patrick. The blank-screen error should be fixed in

<https://github.com/cuny-academic-commons/cac/commit/52ece3dcd2acd8590058ddb098d891d1862838f>. The fix will be deployed to the site within the next hour or two.
