

CUNY Academic Commons - Bug #503

Explore and Possibly Remove WP-Cron Reminder

2010-12-20 08:37 AM - Matt Gold

Status:	Resolved	Start date:	2010-12-20
Priority name:	Normal	Due date:	
Assignee:	Boone Gorges	% Done:	0%
Category name:	WordPress (misc)	Estimated time:	0.00 hour
Target version:	1.1.6		
Description			
<p>As discussed via email, the plugin WP-Cron Reminder is sending messages to the admin account for unknown reasons. Is there a way to see where this plugin is enabled on the site? It does seem unnecessary, and the emails I'm receiving are a bit annoying. So, I'd appreciate it if you could look into removing it if it's not really needed.</p> <p>Thanks for your work on this.</p> <p>Adding Ron as a watcher on this ticket since I know he has been working on Cron issues.</p>			

History

#1 - 2010-12-20 08:52 AM - Boone Gorges

To be clear: This is a plugin called WP Cron, but not the built-in wp-cron.

#2 - 2010-12-20 10:17 AM - Boone Gorges

In <https://github.com/castiron/cac/commit/640e12b7188c67ec99528438a3f289f217c1b0c5> I add a plugin to see which plugins are used on which blogs. These details will become available after 1.1.5, so I'm punting this to the next version.

#3 - 2010-12-20 10:17 AM - Boone Gorges

- Target version changed from 1.1.5 to 1.1.6

#4 - 2010-12-21 11:55 AM - Boone Gorges

- Status changed from Assigned to Resolved

WP-Cron plugin and its child plugins removed in <https://github.com/castiron/cac/commit/8a8c0df3edf73f7529c4ed24fddd49ffd14beeff>. They were only activated on a single blog, where the user appears to have activated every plugin on the system just to play around.
