Description

A member encountered this error to invite someone to the Commons/group from the group admin menu:

I get this response to hitting the "Send Invites" button on the "Invite New Members" page of a Group I admin:

Sorry, [username]@lehman.cuny.edu is not a permitted email address. Please make sure that you have typed the domain name correctly. Please remove the email address and try again.

I have gotten this reply for a number of faculty here at Lehman

This happened at 6pm last night, btw, after 1.1.5

#2 - 2010-12-21 11:25 AM - Boone Gorges

Just to clarify, this is a problem not with the group admin menu, but with the invite-by-email feature.
