Description			
<p>My assumption was that a 'draft' version of a paper is just visible to myself, but if I add a group in the paper settings everyone receives an email notification.</p> <p>Here's the steps I just completed:</p> <ol style="list-style-type: none">1. Create New Paper2. Added text3. In the paper settings, added CAC team4. Clicked 'Save Draft'5. Received an auto-email notifying me that a paper had been added to the CAC Team group <p>I do not see the paper in the Social Paper directory. I do see it in the CAC Team group's RSS feed.</p> <p>Is it by design that a draft can still be shared with groups? I think we need to do a bit of work on clarifying draft vs published visibility and groups, but in the meantime I would vote that we unlink drafts and group notifications.</p>

This is not by design. I agree that draft papers should not be reflected in activity streams, and the fact that they are is likely an oversight. Let's try to fix it for the next release.
