To: Academic Commons, CUNY < commons@gc.cuny.edu >			
Subject: help with google forms for CUE website			
Importance: High			
Greetings,			
I am putting together a call for proposals for the CUE Conference, and I am using the google forms plugin to be able to add a form in the website.			
http://cue.commonsc.gc.cuny.edu/proposal-submission-form/			
The problem I am having is that it is not recognizing the formats, submission button, etc.			
I am using the bridge template			
Can you help me creating a shortcode for the iframe code of the google form instead?			
Here is the iframe code:			
<code><iframe src="https://docs.google.com/forms/d/1PcTa3iljDZ9HuQoEZaE0oVXIVDdzFeRd_L4INGWphTg/viewform?embedded=true" width="760" height="1800" frameborder="0" marginheight="0" marginwidth="0">Loading...</iframe></code>			
I might need to play with the height for this for until it displays without a vertical scroll bar.			
Down the line, I will also need to add other embedding pages for the broadcasting from youtube as well. If I can get access to do that without having to request special codes created for me will be great.			
Thanks in advance for your help

- *Category name set to WordPress Plugins*
- *Assignee set to Raymond Hoh*
- *Target version set to 1.9.4*

Ray, I'm assigning this to you in case this points to a bug in your Google Docs shortcodes. (I'm not sure whether Carlos is using them, or whether they support Forms.)

If it's unrelated, I can create a quick shortcode wrapper. Or you can do it. Either way, let's make the height and width configurable through attributes, so that Carlos can modify as he sees fit.

- *Status changed from New to Reporter Feedback*
- *Assignee changed from Raymond Hoh to Marilyn Weber*

Hi Marilyn,

This shortcode should work:

```
[gdoc link="https://docs.google.com/forms/d/1PcTa3iljDZ9HuQoEZaE0oVXIVDdzFeRd_L4INGWphTg/viewform?embedded=true" width="760" height="1800"]
```

You can always find documentation for the Google Docs Shortcode plugin here:

<https://github.com/cuny-academic-commons/google-docs-shortcode#how-to-use>

Let me know if that works for you.

#3 - 2016-01-08 11:24 AM - Marilyn Weber

I emailed and left a voicemail for Carlos yesterday and am waiting to hear back. Thanks, all!

- *Target version changed from 1.9.4 to 1.9.5*

#5 - 2016-01-12 03:15 PM - Marilyn Weber

He's on Cbox, and is saying that the plug-in doesn't work on that.

#6 - 2016-01-12 04:17 PM - Marilyn Weber

Never mind! He writes:

"That worked, I was using the other plugin, which is the one that is not working (google forms)."

This can be closed. (But another soon follows)
