Thanks for the report, Marilyn. There were some broken variable names in the JavaScript that were causing certain things not to be updated correctly. Could I ask you to verify on the production site please?

On cdev, logged in as Test Student, I can now get Free Entry to work. RSS and Twitter do not allow saving of changes.

Thanks for looking, Marilyn. Actually, though, I didn't deploy the fix to cdev - it's on the production site, <https://commons.gc.cuny.edu>. Could you try there please?
