It seems that I can update the list of venues. Should that be legal? |              |                        |            |

Thanks for the ticket, Raffi. Because of some details related to the way that the Event Organiser plugin implements the Venues functionality, we have to grant non-admin users the ability to manage venues from the front end. But we should not give the same ability to these users on the Dashboard. I've made the change in <https://github.com/cuny-academic-commons/bp-event-organiser/commit/e49aeb3dbf2dc514a45f98c5388dca94c73fc7fe> and it will be part of today's release.
