Description			
Team,			
If possible, we'd like to clone jitp.commons.gc.cuny.edu to jitpdev.commons.gc.cuny.edu. This will allow us to preserve jitpstaging.commons as a pure staging space, and work through some development needs over the next few months in a different space.			
Possible?			
Thx, Luke

Sure. I found a decent plugin for cloning sites and have added it to the repo in <https://github.com/cuny-academic-commons/cac/commit/435d52cbb717fb013d7427690251d0be5462c835>. After tomorrow's release, I'll perform the clone. I'll update this ticket when it's done.

That's really great. I've found replicating WP sites to be a bit of a headache over the years, since so many of the theme settings get reset after a SQL export/import

Hi Luke - I've cloned the site. Everything should be the same as jitp, except that I've changed jitpdev's visibility so that only members of the site can see it: <https://jitpdev.commons.gc.cuny.edu/wp-admin/options-reading.php> Let me know if you have any more issues.

Again: this is awesome. Thanks so much!!!

Awesome, Boone; thanks-

Boone-- can you please add [Luke Waltzer](#) to the CAC github repo? I want to take a look at the plugin so I can better understand the clone process. If you want to keep access to the repo restricted to the devs, that's fine; just send me a link to the plugin site.

Thanks!

I've added you to the repo <https://github.com/cuny-academic-commons/cac/>

This is the plugin: <https://github.com/cuny-academic-commons/cac/tree/master/wp-content/plugins/multisite-clone-duplicator> Looks like this is the place to start reading:

Now that we've published Issue 9, could a superadmin please reclone jitp to jitpdev?

Matt, could you also please add Laura to this thread, so we can consider closing jitp to jitpstaging?

Thx-

#10 - 2016-06-21 12:07 PM - Matt Gold

Sure -- Laura is now a watcher on this ticket

#11 - 2016-06-21 10:33 PM - Boone Gorges

Yes, I can reclone. Just to verify: All existing content on jitpdev will be deleted. This is what you want?

#12 - 2016-06-22 10:59 AM - Luke Waltzer

Yes, thank you. Let's hold off on Laura's okay to do so to jitpstaging, however.

#13 - 2016-06-23 08:03 AM - Boone Gorges

Sounds good. jitpdev.commonsgc.cuny.edu has been recloned, with privacy set to "I would like my site to be visible only to users I add to it."

Hi All,

Let's go ahead and clone the production site (<http://jitp.commonsgc.cuny.edu/>) to the staging site (<http://jitpstaging.commonsgc.cuny.edu/>). Will the password protection still be in place once the site is cloned?

Thank you!!

To clarify: "the password protection" is the WordPress login requirement, correct? If so, I will be sure to mirror it manually after cloning. Or do you mean something else?

#16 - 2016-06-28 03:19 PM - Laura Kane

Yes, the Wordpress login requirement is exactly what I mean. Thank you, Boone!

#17 - 2016-06-28 03:30 PM - Boone Gorges

The site has been cloned. I've set the privacy settings (password protection) to "Admins only"
<https://jitpstaging.commonsgc.cuny.edu/wp-admin/options-reading.php>.

If you need a reclone, please open a new ticket. Thanks!
