

CUNY Academic Commons - Bug #5876

Statpress generating a large number of Apache errors

2016-08-08 01:40 PM - Boone Gorges

Status:	Resolved	Start date:	2016-08-08
Priority name:	Normal	Due date:	
Assignee:	Boone Gorges	% Done:	0%
Category name:	WordPress Plugins	Estimated time:	0.00 hour
Target version:	1.9.24		

Description

They look like this:

```
[Mon Aug 08 10:37:53.158492 2016] [[:error] [pid 31326] [client 172.29.252.76:44430] PHP Warning: mysql_real_escape_string(): No such file or directory in /var/www/html/commons/www/wp-content/plugins/statpress-visitors/statpress.php on line 312
```

I believe this is because no MySQL connection yet exists at the time that the line is being called.

The call to `mysql_real_escape_string()` is unnecessary, because `$wpdb->insert()` eventually calls `$wpdb->prepare()`, which handle the escaping.
