Description

Feature #6122: Plugins to Support Teaching

Author: Luke Waltzer

Status: New

Priority: Normal

Assignee:

Category:

Target version:

In preparation for the Faculty Teaching Fellows project, exploring plugins we might add to enhance the teaching functionality of the space.

What are your thoughts about...

@Boone's WP Grade Comments

<https://wordpress.org/plugins/wp-grade-comments/>

Here's a relatively new gradebook plugin... maybe we can give a test run on dev?

<https://wordpress.org/plugins/an-gradebook/>

Reckoning?

<https://wordpress.org/plugins/reckoning/>

Also, should we explore ways to start tagging metadata to sites for record keeping purposes? Here's the plugin we used on B@B for that purposes, which may be overkill for the Commons (and has options hardcoded into it).

Michael, Matt-- other thoughts?

Oct 4 (10 days ago)

Issue #6122 has been updated by Matt Gold.

I think this looks great. It would be good to round a list of other, existing teaching-related plugins so that we can pull together a "Teaching on the Commons" hub of some kind. Off the top of my head:

- Social Paper (for paper review/feedback)
- CommentPress (for review/feedback)
- Jetpack (for CartoDB map embedding)
- DiRT Tools (for using with groups to see who is using what tool)

others?

Issue #6122 has been updated by Michael Smith.

Recently Registered - adds a sortable column to the users list of a site, I use this in a course blog that continues to add authors semester after semester.

Restrict Author Posting - allows admin to have authors post to particular categories (for example semester to semester categories) and works well in combination with the list category posts plugin already installed

Top Commentators Widget - we may already have something like this

Black Studio TinyMCE Widget - Allows for the "kitchen sink" in a widget editor. Nice for those don't know HTML and as an alternative to the Text widget.

Issue #6122 has been updated by Matt Gold.

Luke/Michael: perhaps we could separate out the plugins that need testing/further thought and those that can/should be added more

or less immediately. If there are any plugins that look like they might be good to add in the short term, please create a new ticket and we can use this one for ongoing discussion.
