I opened <https://github.com/scholarpress/scholarpress-coins/issues/5> so that ScholarPress COInS will show up on our wordpress.org profile.

I can't think of anything I've shepherded into WordPress or BuddyPress over the past release or two that came specifically from the Commons.

Ray, anything on your end? Was <https://buddypress.trac.wordpress.org/ticket/6544> done with the Commons in mind?

I guess we should have a regular task where we take stock after a WP or BP release, when these things are fresh in our minds.

I've set a reminder to do a review every six months, with the first scheduled date in the first week of December.
