Description

If a blog is a group blog (and BuddyPress Group Blog is showing) then if you try to use QuickPress to make a post it redirects you to the home page of the blog as soon as you click inside of the Title field. If you disassociate the blog from the group then QuickPress works again. Video example attached.

Assigning this to Ray for the moment because I'm swamped for the next few days, but no pressure, Ray - I made this mess and I will gladly clean it up when I have a free moment :)

This was a journey! :)

Took awhile trying to find the offending code in the /bp-groupblog/ directory. After scratching my head for awhile, decided to look in bp-custom.php!

Fix missing hyperlink closing tag in BP Groupblog dashboard widget:
