CUNY Academic Commons - Bug #7671

Incorrect indentation on elements

2017-02-15 10:21 AM - Raffi Khatchadourian

Status:	Resolved		**Start date:**	2017-02-15
Priority name:	Normal		**Due date:**

Category name:	Layout		**Estimated time:**	0.00 hour
Target version:	Future release			

Description

The bullet indentation at https://khatchad.commons.gc.cuny.edu/research/background/ (towards the bottom of the page) seems wrong. Shouldn't the overflow text be aligned with the bullet? Perhaps this is a CSS issue with the selected theme?

It looks OK in Firefox but not in Chrome. I briefly tried messing with list-style-position and padding but wasn't immediately successfuly.

I'm guessing that the inconsistent rendering has to do with the fact that the markup isn't standard. The li element isn't inside of a ul or li, which makes it indeterminate what the browser should use for alignment. Did you write the markup yourself, or is it coming from a plugin?

It's coming from a short code from the link manager plugin.

Thanks, Raffi.

Dan, could you have a look to see if there's a way to make the shortcode generate correct HTML?

I was able to get this to work by going into the "advanced" tab of the library's settings and putting <ul> in the "Before first link" box and in the "After last link" box. Let me know if that works for you!
