<b>Description</b>			
<p>Gerry Martini reports that the Events Calendar plug-in suddenly "does not allow us to add an organizer or a location/venue any more". Both of these features did work in the past. I went into the admissions site dashboard (<a href="https://admissions.common.gc.cuny.edu/wp-admin/post-new.php?post_type=tribe_events">https://admissions.common.gc.cuny.edu/wp-admin/post-new.php?post_type=tribe_events</a>) and indeed, the fields are visible but you cannot add any information. I've attached a screenshot which shows that the field for event URL and cost have a writable box, but venue and organizer have nothing to click on or write in.</p> <p>Gerry had had other problems with this last year - <a href="https://redmine.gc.cuny.edu/issues/5875">https://redmine.gc.cuny.edu/issues/5875</a>.</p> <p>Should we suggest another plug-in?</p> <p>Thanks!</p>

Hi Marilyn - I've traced the problem down to a bug in The Events Calendar, which I've described here: <https://github.com/modertribe/tribe-common/pull/495> There's a hotfix in place on the Commons, and I'll add the plugin to the auto-update blacklist until I hear from the developer that the issue has been fixed in the plugin.

Could you please ask the user to verify that things are working properly?

Works great now. Thanks!

#### #3 - 2017-08-18 04:36 PM - Boone Gorges

- Status changed from Reporter Feedback to Resolved

Great, thanks!

It turns out that, by coincidence, the plugin devs fixed this very issue just a few days ago, in a version that will be released very soon.
