Description

I joined a newly created group, <https://commons.gc.cuny.edu/groups/connected-cuny-planning-teams/>, and tried to create a Social Paper in it. The paper appears to be created but when I try to connect it to my group, I get a list of other groups I've joined but not this one. Is there simply a lag? I joined the group yesterday.

This is on a PC using Firefox.

Could you please link to the paper?

I think I figured it out - check out <https://commons.gc.cuny.edu/papers/connected-cuny-test/> and see if you can edit it the way you want.

Thanks!

Would you mind promoting me to admin? That was Rachel's intention.

Boone -

Rachel would like to remove you as admin from this group. Is that okay? If so, I guess you must remove yourself. Thanks!
