Description			
Hi Ray, I can't remember whether you've implemented error messages on RBE posts with attachments, but I created a new topic via email, and the email had an attachment that did not post. I did not receive an error message. Here is the post: https://commons.gc.cuny.edu/groups/gc-digital-fellows/forum/topic/fwd-fw-call-for-proposals-for-cuny-accessibility-conference/ As an FYI, I have attached the attachment to this ticket

- Target version set to 1.12.3

Ahh, good catch.

Attachments will work when replying, but not posting a new topic at the moment. The reason is I only implemented attachments in IMAP mode and not Inbound Mode, which is what is powering the RBE custom email address for new topics.

I hope to have something for the next maintenance release on Tuesday.

- Target version changed from 1.12.3 to 1.12.4

#5 - 2017-12-12 11:04 AM - Raymond Hoh

Edit: Sorry wrong ticket! I'm about to push a fix for this, but Boone, let me know if I'm too late for 1.12.4.

Ran out of time on this one.

#6 - 2017-12-12 11:05 AM - Raymond Hoh

- Target version changed from 1.12.4 to 1.12.5

I'm about to push a fix for this, but Boone, let me know if I'm too late for 1.12.4.

Ugh, form autofill!

#7 - 2017-12-12 11:07 AM - Boone Gorges

ha ha :) The release will go out in about 15 minutes, if you still want to sneak something in...

Sorry for missing the dev call. Didn't set my alarm and completely overslept!

As for an update here, I have code that is working and will have something to commit by tomorrow. Just cleaning up the code and testing IMAP to see if I didn't break anything on that end.

I decided to write a new supplementary plugin for this since the code will be using a 3rd-party email parser requiring PHP 5.4+ and RBE currently supports PHP 5.2. Here's a link to the library I'll be using - <https://github.com/bashkarev/email>

I'll definitely have this ready for next week's maintenance release.

- Status changed from Assigned to Staged for Production Release

I've made some changes to RBE - <https://github.com/cuny-academic-commons/cac/commit/a02a716f8ab57a965d30a506c95294b84614bcd7>

And created a new plugin for this functionality [here](#).

Plugin added to 1.12.x branch - <https://github.com/cuny-academic-commons/cac/commit/2eeaf967dac9f6fd0e3bb34a5ca4d9a3edd1ed4a>

I rogue-tested this lightly on NYCDH on Friday and it worked.

Boone: I've updated the ACTION_REQUIRED page.

- Status changed from Staged for Production Release to Resolved

Oops, I forgot to activate after the 1.12.5 release. I've just done so.

#12 - 2017-12-28 01:49 PM - Raymond Hoh

- Status changed from Resolved to Assigned

Thanks for activating, Boone.

Just did a quick test and it appears attachments for new topics created via email address isn't working on the Commons.

Due to the nature of the plugin, I'm going to have to do some live debugging to figure out what is wrong.

#13 - 2017-12-28 03:41 PM - Raymond Hoh

- Status changed from Assigned to Resolved

Added a hotfix on production - <https://github.com/cuny-academic-commons/cac/commit/f261ddb5b3940ac2ccd9bcfa105119c46ad61a67>

Just tested by creating a new topic via email address with an email attachment and it works now.

#14 - 2017-12-28 03:49 PM - Matt Gold

that's great! Thank you, Ray!!
