See https://redmine.gc.cuny.edu/issues/9729#note-10			
<p>One more question: The meta data that I am adding to Guest Author pages through Yoast (title tags & meta descriptions) do not seem to be taking. It seems that the primary Author meta info remains. For instance, as you can see on Adam Hilton's guest author page (https://newlaborforum.commonsc.gc.cuny.edu/?author_name=adam-hilton), I have added Yoast SEO overrides, but the default author info (Samantha Valente) continues to show.</p>
