

CUNY Academic Commons - Support #9886

cuny.is SSL

2018-06-05 11:44 AM - Marilyn Weber

Status: Resolved	Start date: 2018-06-05

Category name: cuny.is	Estimated time: 0.00 hour
Target version: Not tracked	
Description I recently created https://cuny.is/SPSWritingFellows for https://bacwritingfellows.commons.gc.cuny.edu . It works fine for me but the admin reports "When I go to the link, it works. However, some others have done so and got an error message. (See attached.). I guess this is because cuny.is< http://cuny.is > does not have SSL and the user's browser is set up to reject insecure websites. Is there anything that can be done to avoid this? We don't want students to not get through due to their browser settings."

- Target version set to Not tracked

We're working on SSL for cuny.is as part of summer system updates.

The problem here is this:

I recently created <https://cuny.is/SPSWritingFellows>

You didn't really create <https://cuny.is/SPSWritingFellows>, you created <http://cuny.is/SPSWritingFellows>. Be sure that when you share these URLs, you don't share an HTTPS version.

Will do. Please lmk when the SSL situation has been resolved. Impressed with your speedy reply! Thanks!

cuny.is is now SSL-only, so we're all set here.
