

CUNY Academic Commons - Bug #9926

twitter-mentions-as-comments cron jobs can run long

2018-06-13 10:32 PM - Boone Gorges

Status:	New	Start date:	2018-06-13
Priority name:	Normal	Due date:	
Assignee:	Boone Gorges	% Done:	0%
Category name:	WordPress Plugins	Estimated time:	0.00 hour
Target version:	Future release		
Description			
<p>Just logged a long request triggered by a cron job in twitter-mentions-as-comments. It appears that the plugin does an hourly check that involves pulling up every single post on the site. This can take a very long time when a site has many posts. The plugin has no obvious internal mechanism for dividing this process into batches.</p> <p>The plugin hasn't been updated in 5 years, so we might consider disabling it. Here are the sites where it's running:</p> <pre>[0] => http://connections.common.gc.cuny.edu [1] => http://jitp.common.gc.cuny.edu [0] => http://newtestsite.common.gc.cuny.edu [1] => http://eshtestcac.common.gc.cuny.edu [2] => http://arctest2.common.gc.cuny.edu [3] => http://acert.common.gc.cuny.edu [0] => http://jitpdev.common.gc.cuny.edu [1] => http://jitpstaging.common.gc.cuny.edu [2] => http://foodsolar.common.gc.cuny.edu</pre> <p>I'll start by putting 15 minutes in to see if I can rewrite the plugin to use separate cron tasks for each post.</p>
